

Website Performance, SEO & Technical Health Report

<https://www.amipi.com>

Overall health

76/100

Pages audited

115

Completed

2026-07-19

1. Executive Summary

The crawl analyzed 115 pages and identified 34 distinct issues across 4830 total page instances. 120 findings are critical. Address the top priorities to improve stability and UX.

Audit scope: Breadth-first internal crawl with static HTML inspection, response timing, payload measurement, technical SEO, metadata, accessibility, content, URL, and performance checks. Note: Scoring is derived from an internal crawl methodology and is not directly equivalent to third-party audit tool scores.

Top Priorities & What Needs To Be Done

- **Missing <title> tag**
Why it matters: Search relevance and click-through rate
To do: Create unique titles, descriptions, canonicals, and one clear H1 per indexable page.
- **Very slow response time: 13426ms**
Why it matters: User experience, conversion, and Core Web Vitals
To do: Reduce server time, defer non-critical JavaScript, compress media, and cache assets.

120 Critical findings	2217 Medium findings	2493 Low findings	4830 Total findings

2. Issues Fixed Since Last Run

✓ 3 issues resolved since the last audit. Great progress!

CATEGORY	PAGES	ISSUE & SAMPLES	RECOMMENDATION FOLLOWED
Broken Links	2	Broken resource (a): HTTP 400 https://www.amipi.com/sell.php https://www.amipi.com/register/downloads/application.pdf	Problem detected on https://www.amipi.com/sell.php : Broken resource (a): HTTP 400. Current target/value: https://www.facebook.com/Amipi-Diamonds-166389680059646/?fref=nf . Replace it with the current external destination, cite an alternative authoritative source, or remove the link if it is no longer needed.
Broken Links	1	Broken resource (a): HTTP 403 (Anti-Bot/Access Denied) https://www.amipi.com/sell.php	Problem detected on https://www.amipi.com/sell.php : Broken resource (a): HTTP 403 (Anti-Bot/Access Denied). Current target/value: https://www.americangemsociety.org/ . Because the target blocks automated checks, manually verify it in a browser; if it is not essential, replace it with a stable source that returns 200 for normal crawlers.
Performance	1	High resource count on page: 101 (scripts/CSS/images) https://www.amipi.com/pay	https://www.amipi.com/pay has too many page resources. Current value: High resource count on page: 101 (scripts/CSS/images); detected breakdown: 28 scripts, 28 stylesheets, 43 images. Bundle or remove duplicate JS/CSS, lazy-load below-the-fold images, and defer non-critical third-party scripts on this page.

3. New Issues Identified

⚠ 27 new issues detected since the last audit. These require review.

8. Detailed Findings by Category

User experience, conversion, and Core Web Vitals

Recommended approach: Reduce server time, defer non-critical JavaScript, compress media, and cache assets.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
CRITICAL VIEWPORT: DESKTOP, MOBILE	69	Very slow response time: 13426ms https://www.amipi.com https://www.amipi.com/sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com is slow at crawl time. Current value: Very slow response time: 13426ms. Cache the generated HTML for this page, reduce backend/database work for its route, and serve static assets through the CDN. The immediate target is under 1000ms response time, with critical pages ideally below 500ms.
MEDIUM VIEWPORT: DESKTOP, MOBILE	67	31 render-blocking <script> tags (no async/defer) https://www.amipi.com https://www.amipi.com/sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com has render-blocking scripts. Current value: 31 render-blocking <script> tags (no async/defer). Add defer to non-critical scripts such as https://ma.zoho.com/hub/js/WebsiteAutomation.js , https://chimpstatic.com/mcjs-connected/js/users/91f57d397080494a0a49ccc7f/8b24b6cfa2944807b71ebc231.js , //www.google-analytics.com/analytics.js , https://www.googletagmanager.com/gtag/js?id=G-HZMFWWPNL5&cx=c&gtm=4e67g0h2 , and keep only scripts required for first paint synchronous. This reduces parser blocking and improves first render/LCP timing.
LOW VIEWPORT: DESKTOP, MOBILE	60	High resource count on page: 108 (scripts/CSS/images) https://www.amipi.com https://www.amipi.com/sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com has too many page resources. Current value: High resource count on page: 108 (scripts/CSS/images); detected breakdown: 31 scripts, 28 stylesheets, 49 images. Bundle or remove duplicate JS/CSS, lazy-load below-the-fold images, and defer non-critical third-party scripts on this page.
MEDIUM VIEWPORT: DESKTOP, MOBILE	67	Broken resource request (404) on page Resource: https://www.amipi.com/product_thumb.php?img=images/category_navigation_image/202006291448334040_Main_W.jpg&w=150&h=150 https://www.amipi.com https://www.amipi.com/sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com requests a missing asset: https://www.amipi.com/product_thumb.php?img=images/category_navigation_image/202006291448334040_Main_W.jpg&w=150&h=150 . Replace the reference with the correct asset URL, restore the missing file, or remove the tag if the asset is no longer used. A 404 asset wastes requests and can break visual layout, tracking, or interactive behavior.
LOW VIEWPORT: DESKTOP, MOBILE	67	Large third-party script loaded: 139.9KB URL: https://s3.amazonaws.com/downloads.mailchimp.com/js/mc-validate.js https://www.amipi.com https://www.amipi.com/sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com loads a large third-party script: https://s3.amazonaws.com/downloads.mailchimp.com/js/mc-validate.js . Current value: Large third-party script loaded: 139.9KB. Load it after consent or interaction where possible, add defer/async, and remove it from this page if it is not required for conversion tracking or functionality.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
MEDIUM VIEWPORT: DESKTOP, MOBILE	69	Heavy JavaScript payload: 2.6MB https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com ships too much JavaScript. Current value: Heavy JavaScript payload: 2.6MB. Review the largest scripts first: https://www.amipi.com/js/jquery-ui.js (460 KB), https://www.gstatic.com/recaptcha/releases/A7KpaEASfhDcK0nXxgQEyyYv/recaptcha__en.js (373 KB), https://www.gstatic.com/recaptcha/releases/A7KpaEASfhDcK0nXxgQEyyYv/recaptcha__en.js (373 KB), https://www.gstatic.com/recaptcha/releases/A7KpaEASfhDcK0nXxgQEyyYv/recaptcha__en.js (373 KB). Remove unused libraries, split page-specific code, and defer non-critical bundles.

Search relevance and click-through rate

Recommended approach: Create unique titles, descriptions, canonicals, and one clear H1 per indexable page.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
LOW VIEWPORT: DESKTOP, MOBILE	44	Title length is 45 chars (recommended 50-60) Wholesale Diamonds & Fine Jewelry AMIPI Inc https://www.amipi.com https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/ https://www.amipi.com/hoops/	Current title on https://www.amipi.com : "Wholesale Diamonds & Fine Jewelry AMIPI Inc" (45 characters). Recommended replacement (55 characters): "START YOUR DIAMOND SEARCH HERE Diamonds Jewelry AMIPI". The replacement keeps the page topic and brand visible while moving the title closer to the 50-60 character range used in the audit.
MEDIUM VIEWPORT: DESKTOP, MOBILE	71	Missing meta description https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com currently has no meta description. Recommended meta description (129 characters): "Explore START YOUR DIAMOND SEARCH HERE from AMIPI, including key services, product information, and helpful details for visitors.". This summary is based on the page content and gives search/social snippets a specific value proposition instead of leaving the snippet to be auto-generated.
MEDIUM VIEWPORT: DESKTOP, MOBILE	71	Missing canonical tag https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com does not expose a clean preferred URL for search engines. Add or update the canonical tag to: <code><link rel="canonical" href="https://www.amipi.com/"></code> . This consolidates ranking signals and prevents duplicate URL variants from competing with this page.
LOW VIEWPORT: DESKTOP, MOBILE	69	Missing lang attribute on <html> https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com is missing the document language declaration. Current value: no lang attribute detected. Set the root element to <code><html lang="en"></code> , or replace "en" with the actual primary page language. This improves accessibility pronunciation and search engine language interpretation.
MEDIUM VIEWPORT: DESKTOP, MOBILE	24	Missing H1 tag https://www.amipi.com/basics/ https://www.amipi.com/studs/ https://www.amipi.com/hoops/ https://www.amipi.com/certified.php/ (and 1 variant) https://www.amipi.com/bracelets/	https://www.amipi.com/basics/ currently has no H1. Recommended H1: "Diamond Jewelry Basics Wholesale AMIPI Inc". This gives users and crawlers one clear primary heading that matches the page topic instead of forcing them to infer the subject from smaller headings or navigation.
CRITICAL VIEWPORT: DESKTOP	2	Missing <title> tag https://www.amipi.com/My-Account https://www.amipi.com/My-Wishlist/	https://www.amipi.com/My-Account currently has no <code><title></code> tag. Recommended title (18 characters): "My Account AMIPI". This gives the page a specific search result headline based on its content and keeps the title close to the recommended display length.

Reliable previews and referral engagement

Recommended approach: Add unique Open Graph and Twitter/X card tags.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
LOW VIEWPORT: DESKTOP, MOBILE	71	Missing Open Graph title Add og:title for reliable social previews. https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com is missing og:title. Add <meta property="og:title" content="Wholesale Diamonds & Fine Jewelry AMIPI Inc"> so shared links use the page-specific title instead of a platform-generated fallback.
LOW VIEWPORT: DESKTOP, MOBILE	71	Missing Open Graph description Add og:description using the page's unique value proposition. https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com is missing og:description. Add <meta property="og:description" content="Explore AMIPI Inc for high-quality wholesale diamonds and fine jewelry. Trusted by retailers for exceptional craftsmanship and service."> so social previews explain this page's value using the same page-specific message as search snippets.
LOW VIEWPORT: DESKTOP, MOBILE	71	Missing Twitter/X card metadata Add twitter:card and related sharing tags. https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com is missing Twitter/X card metadata. Add <meta name="twitter:card" content="summary_large_image"> plus twitter:title="Wholesale Diamonds & Fine Jewelry AMIPI Inc" and twitter:description="Explore AMIPI Inc for high-quality wholesale diamonds and fine jewelry. Trusted by retailers for exceptional craftsmanship and service." so X displays a complete preview.

Accessibility

C 352 findings

Inclusive use and WCAG alignment

Recommended approach: Correct semantic and accessible-name issues, then validate with keyboard and screen-reader testing.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
MEDIUM VIEWPORT: DESKTOP, MOBILE	69	Document language is not declared Add a valid lang attribute to <html>. https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com is missing the document language declaration. Current value: no lang attribute detected. Set the root element to <html lang="en">, or replace "en" with the actual primary page language. This improves accessibility pronunciation and search engine language interpretation.
MEDIUM VIEWPORT: DESKTOP, MOBILE	69	14 links have no accessible name Add visible link text or an aria-label. https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com contains links without accessible names. Current value: 14 links have no accessible name. Add visible text or aria-label values that describe each destination, for example aria-label="View Homepage details" for icon-only links. This makes the exact link purpose available to screen readers.
MEDIUM VIEWPORT: DESKTOP, MOBILE	69	94 form controls lack labels Associate each control with a label or aria-label. https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com contains form controls without labels. Current value: 94 form controls lack labels. Add <label for="field-id">Descriptive field name</label> or aria-label on each specific input, using the field purpose visible near that control. This prevents screen reader users from encountering unnamed fields.

ALT Tags

A 280 findings

Accessibility and image search

Recommended approach: Add concise, descriptive ALT text; use empty ALT only for decorative images.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
LOW VIEWPORT: DESKTOP, MOBILE	67	Image missing ALT attribute https://amipi.com/images/footer-logo/jewelry-f.png https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	Image missing ALT text on https://www.amipi.com: https://amipi.com/images/footer-logo/jewelry-f.png. Recommended ALT text: "Jewelry f". This describes the specific image using nearby page context and filename signals, improving accessibility and image search relevance.

Indexation and rich search results

Recommended approach: Implement sitemap, robots, canonical, and appropriate Schema.org markup.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
LOW VIEWPORT: DESKTOP, MOBILE	1	Sitemap URL is not declared in robots.txt https://www.amipi.com/robots.txt	https://www.amipi.com/robots.txt exists but does not declare the sitemap. Add this line to robots.txt: Sitemap: https://www.amipi.com/sitemap.xml. This gives crawlers a direct route to the canonical URL inventory.
MEDIUM VIEWPORT: DESKTOP, MOBILE	71	No recognized Structured Data (JSON-LD schema) found Consider adding Organization, Product, or BreadcrumbList schema. https://www.amipi.com https://www.amipi.com//sell/ https://www.amipi.com/basics/ https://www.amipi.com/ https://www.amipi.com/studs/	https://www.amipi.com has no recognized JSON-LD structured data. Add Organization schema tied to this page, for example { "@context": "https://schema.org", "@type": "Organization", "name": "START YOUR DIAMOND SEARCH HERE", "url": "https://www.amipi.com/", "publisher": { "@type": "Organization", "name": "AMIP!" } }. This gives search engines and AI crawlers an explicit entity/page relationship instead of relying only on visible text.

Broken Links

C85 findings

Crawlability & trust

Recommended approach: Repair the source URL or update references to the final 200-status destination.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
MEDIUM VIEWPORT: DESKTOP, MOBILE	44	Crawling blocked by robots.txt This URL cannot be crawled or indexed. https://www.amipi.com/diamonds/ (and 42 variants) https://www.amipi.com/diamonds	Problem detected on https://www.amipi.com/diamonds/: Crawling blocked by robots.txt. Current target/value: https://www.amipi.com/diamonds/. If https://www.amipi.com/diamonds/ should be audited or indexed, update robots.txt to allow this path; otherwise remove it from crawl targets and XML sitemaps.
MEDIUM VIEWPORT: DESKTOP	3	Broken resource (a): HTTP 400 Target: https://www.facebook.com/Amipi-Diamonds-166389680059646/?fref=nf (Found on 69 pages) https://www.amipi.com/bands/ https://www.amipi.com/bracelets https://www.amipi.com/natural-diamonds/	Problem detected on https://www.amipi.com/bands/: Broken resource (a): HTTP 400. Current target/value: https://www.facebook.com/Amipi-Diamonds-166389680059646/?fref=nf. Replace it with the current external destination, cite an alternative authoritative source, or remove the link if it is no longer needed.
LOW VIEWPORT: DESKTOP	2	Broken resource (a): HTTP 403 (Anti-Bot/Access Denied) Target: https://www.ameriangemsociety.org/ (Found on 69 pages) https://www.amipi.com/bands/ https://www.amipi.com/bracelets	Problem detected on https://www.amipi.com/bands/: Broken resource (a): HTTP 403 (Anti-Bot/Access Denied). Current target/value: https://www.ameriangemsociety.org/. Because the target blocks automated checks, manually verify it in a browser; if it is not essential, replace it with a stable source that returns 200 for normal crawlers.

URL Structure

A 17 findings

Duplicate prevention and crawl efficiency

Recommended approach: Normalize URL casing and slashes, enforce one canonical version, and redirect alternatives.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
MEDIUM VIEWPORT: DESKTOP, MOBILE	1	URL contains repeated slashes Redirect to one normalized URL and update internal links. https://www.amipi.com//sell/	https://www.amipi.com//sell/ does not expose a clean preferred URL for search engines. Add or update the canonical tag to: <link rel="canonical" href="https://www.amipi.com/sell/">. This consolidates ranking signals and prevents duplicate URL variants from competing with this page.
LOW VIEWPORT: DESKTOP, MOBILE	10	URL contains uppercase characters Use lowercase canonical URLs consistently. https://www.amipi.com/Testimonials/ https://www.amipi.com/Contact-Us/ https://www.amipi.com/Schedule-Appointment/ https://www.amipi.com/My-Cart/ https://www.amipi.com/Privacy-Policy/	https://www.amipi.com/Testimonials/ does not expose a clean preferred URL for search engines. Add or update the canonical tag to: <link rel="canonical" href="https://www.amipi.com/testimonials/">. This consolidates ranking signals and prevents duplicate URL variants from competing with this page.

Content

A 13 findings

Organic relevance and customer confidence

Recommended approach: Expand thin landing pages with useful copy, FAQs, headings, and contextual internal links.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
LOW VIEWPORT: DESKTOP, MOBILE	7	No H2 subheadings found Organize the page with descriptive H2 sections. https://www.amipi.com/bands/ https://www.amipi.com/Contact-Us/ https://www.amipi.com/compare-product.php https://www.amipi.com/bands https://www.amipi.com/Contact-Us	https://www.amipi.com/bands/ has no H2 subheadings. Add page-specific H2s such as "Bands Overview", "Key Benefits", and "Frequently Asked Questions" based on the current content terms: amipi, diamonds, bracelets, bangles, schedule.
MEDIUM VIEWPORT: DESKTOP, MOBILE	3	Thin page content: approximately 0 words Add useful, intent-focused copy, FAQs, and internal links. https://www.amipi.com/My-Account https://www.amipi.com/My-Wishlist/ https://www.amipi.com/bands/	https://www.amipi.com/My-Account has thin or hard-to-read static content. Current value: Thin page content: approximately 0 words; prominent detected terms: Data Not Available. Expand the page with specific copy about My Account, include FAQs, and add internal links to related service/product pages so both users and non-rendering crawlers understand the page.

Generative Engine Optimization

Recommended approach: Add an llms.txt file, ensure Entity schema is present, and make content accessible to non-rendering bots.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
MEDIUM VIEWPORT: DESKTOP, MOBILE	1	Missing Organization or Person schema Entity schema is critical for Knowledge Graphs used by LLMs to answer queries. https://www.amipi.com	https://www.amipi.com has no recognized JSON-LD structured data. Add Organization schema tied to this page, for example <pre>{"@context":"https://schema.org","@type":"Organization","name":"START YOUR DIAMOND SEARCH HERE","url":"https://www.amipi.com/","publisher":{"@type":"Organization","name":"AMIPi"}}</pre> . This gives search engines and AI crawlers an explicit entity/page relationship instead of relying only on visible text.
LOW VIEWPORT: DESKTOP	2	Thin static HTML content (Possible JS dependency) Page has very little text in raw HTML. Non-rendering LLM crawlers may fail to read your content if it relies on client-side rendering. https://www.amipi.com/My-Account https://www.amipi.com/My-Wishlist/	https://www.amipi.com/My-Account has thin or hard-to-read static content. Current value: Thin static HTML content (Possible JS dependency); prominent detected terms: Data Not Available. Expand the page with specific copy about My Account, include FAQs, and add internal links to related service/product pages so both users and non-rendering crawlers understand the page.

Social

Website quality

Recommended approach: Review and resolve the affected URLs.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
LOW VIEWPORT: DESKTOP	1	Missing YouTube profile link on homepage https://www.amipi.com	https://www.amipi.com does not expose a YouTube profile link in the scanned homepage markup. Add the verified YouTube profile URL in the header/footer near the existing contact or brand links. Use the real profile URL only; if the company does not maintain that profile, document it as intentionally unavailable instead of linking to an empty account.
LOW VIEWPORT: DESKTOP	1	Missing X/Twitter profile link on homepage https://www.amipi.com	https://www.amipi.com does not expose a X/Twitter profile link in the scanned homepage markup. Add the verified X/Twitter profile URL in the header/footer near the existing contact or brand links. Use the real profile URL only; if the company does not maintain that profile, document it as intentionally unavailable instead of linking to an empty account.
LOW VIEWPORT: DESKTOP	1	No Facebook Pixel tracking detected https://www.amipi.com	https://www.amipi.com has no Meta Pixel script detected. If Facebook/Instagram ads or retargeting are active, install the site-specific Meta Pixel ID through GTM or the page template and verify the fbq('track', 'PageView') event. If paid social is not used, mark this as intentionally not applicable rather than adding tracking unnecessarily.

Security

Visitor safety and browser trust

Recommended approach: Remove mixed content and deploy protective response headers after compatibility testing.

SEVERITY	AFFECTED PAGES	FINDING & SAMPLES	RECOMMENDED FIX
MEDIUM VIEWPORT: DESKTOP, MOBILE	1	Missing Security Headers: HSTS Implement missing headers to protect against clickjacking, MIME-sniffing, and downgrade attacks. https://www.amipi.com	On https://www.amipi.com , the response is missing: HSTS. This weakens protection against clickjacking, MIME-sniffing, or HTTPS downgrade attacks. Configure the web server/CDN to return: Strict-Transport-Security: max-age=31536000; includeSubDomains; preload.

9. Real Core Web Vitals (Lighthouse Lab Data)

Browser-rendered metrics from Google PageSpeed Insights for the homepage (<https://www.amipi.com>).

Desktop Performance

3.2 s	5.6 s
LCP	INP
0.002	350 ms
CLS	TBT
6.0 s	0.8 s
Speed Index	FCP

Mobile Performance

11.0 s	25.8 s
LCP	INP
0	520 ms
CLS	TBT
13.7 s	4.3 s
Speed Index	FCP

10. Crawl-Time Performance Analysis

Interpretation: These are crawl-time response and HTML transfer measurements across all internal pages. They provide broad site coverage but are deliberately not presented as Core Web Vitals.

Homepage Resource Breakdown (Network Waterfall)

Total transfer size by asset type measured via headless browser.

Resource Type	Transfer Size	GTmetrix / Optimization Savings Estimate
Scripts (JS)	2679.9 KB	Minifying and deferring unused JS could save up to 30%.
Images	1326.6 KB	Converting to WebP/AVIF and proper sizing typically saves 40-60%.
Stylesheets (CSS)	239.6 KB	Removing unused CSS can save 10-20%.
Fonts	281.3 KB	Using WOFF2 and font-display: swap improves rendering.
Documents (HTML)	542.4 KB	Gzip/Brotli compression usually handles this efficiently.
Other / Third-Party	440.2 KB	Review third-party pixels and embeds.

11. Social Profile & Tracking Presence

We scanned the homepage for connected social profiles and essential tracking pixels.

PLATFORM	DETECTED?	FOUND URL / DETAILS
Facebook	YES	https://www.facebook.com/Amipi-Diamonds-166389680059646/?fref=nf
Instagram	YES	https://www.instagram.com/amipiinc/
LinkedIn	YES	https://www.linkedin.com/company/amipi-inc-
YouTube	NO	Not found on homepage
X/Twitter	NO	Not found on homepage
Facebook Pixel	NO	Not found on homepage

12. Technology & Infrastructure

Fingerprinting of the underlying web server, hosting, CMS, and DNS infrastructure.

Component	Detected Value
Web Server	nginx/1.31.1
Hosting IP	144.208.74.247
CMS / Generator	Unknown
Frontend Libraries	Bootstrap, Bootstrap CSS, Font Awesome, Google Analytics, Google Tag Manager, jQuery
SPF Record (Email Security)	Configured
DMARC Record (Email Security)	Configured

13. Keyword Analysis (Homepage)

Top keywords and phrases extracted from the homepage text, cross-referenced with crucial on-page SEO elements.

Top Keywords (Unigrams)

KEYWORD	COUNT	IN TITLE	IN DESC	IN H1-H6
diamonds	16	Yes	No	No
amipi	16	Yes	No	Yes
email	12	No	No	No
jewelry	11	Yes	No	No
diamond	9	Yes	No	Yes
price	9	No	No	Yes
certified	7	No	No	No
bracelets	7	No	No	Yes
bangles	7	No	No	Yes
make	7	No	No	No

Top Phrases (Bigrams)

PHRASE	COUNT	IN TITLE	IN DESC	IN H1-H6
natural diamonds	5	No	No	No
bracelets bangles	5	No	No	No
make payment	5	No	No	No
diamonds round	4	No	No	No
round marquise	4	No	No	No
marquise princess	4	No	No	No
princess asscher	4	No	No	No
asscher cushion	4	No	No	No
cushion radiant	4	No	No	No
radiant oval	4	No	No	No

14. External SEO Data (Backlinks & Traffic)

Off-page SEO metrics that require external search-index data.

Detailed Backlink Analysis

Out of scope — requires external data provider.
An SEO API key (e.g., DataForSEO, Ahrefs) must be configured in your environment to fetch backlink counts.

Organic Traffic Trends

Out of scope — requires external ranking data.
An SEO API key must be configured in your environment to pull organic ranking trends.

Advanced Performance Optimization Opportunities

This section adds Lighthouse and GTmetrix-style performance optimization analysis without changing the existing report scores or findings above.

Data availability: Actual savings are shown only when returned by PageSpeed/Lighthouse. GTmetrix-specific values require a GTmetrix data source and are marked Data Not Available when absent.

Detailed opportunity analysis

Priority	Issue	Description	Why it matters	Expected improvement	Difficulty
Critical	Reduce unused JavaScript	Reduce unused JavaScript and defer loading scripts until they are required to decrease bytes consumed by network activity. [Learn how to reduce unused JavaScript] (https://developer.chrome.com/docs/lighthouse/performance/unused-javascript/).	Unused JavaScript increases transfer size, parsing time, and main-thread work.	Lower JS transfer, faster parsing, reduced TBT, and improved LCP on script-heavy pages.	Medium
Critical	Reduce unused JavaScript	Reduce unused JavaScript and defer loading scripts until they are required to decrease bytes consumed by network activity. [Learn how to reduce unused JavaScript] (https://developer.chrome.com/docs/lighthouse/performance/unused-javascript/).	Unused JavaScript increases transfer size, parsing time, and main-thread work.	Lower JS transfer, faster parsing, reduced TBT, and improved LCP on script-heavy pages.	Medium
Critical	Reduce initial server response time	Keep the server response time for the main document short because all other requests depend on it. [Learn more about the Time to First Byte metric] (https://developer.chrome.com/docs/lighthouse/performance/time-to-first-byte/).	Slow server response delays every render milestone that depends on the HTML document.	Lower TTFB and faster FCP/LCP.	Hard
Critical	Reduce initial server response time	Keep the server response time for the main document short because all other requests depend on it. [Learn more about the Time to First Byte metric] (https://developer.chrome.com/docs/lighthouse/performance/time-to-first-byte/).	Slow server response delays every render milestone that depends on the HTML document.	Lower TTFB and faster FCP/LCP.	Hard

Priority	Issue	Description	Why it matters	Expected improvement	Difficulty
Critical	Reduce unused CSS	Reduce unused rules from stylesheets and defer CSS not used for above-the-fold content to decrease bytes consumed by network activity. [Learn how to reduce unused CSS] (https://developer.chrome.com/docs/lighthouse/performance/unused-css-rules/).	Unused CSS blocks rendering and adds unnecessary bytes before the page can paint.	Reduced render-blocking CSS and faster FCP/LCP.	Medium
Critical	Reduce unused CSS	Reduce unused rules from stylesheets and defer CSS not used for above-the-fold content to decrease bytes consumed by network activity. [Learn how to reduce unused CSS] (https://developer.chrome.com/docs/lighthouse/performance/unused-css-rules/).	Unused CSS blocks rendering and adds unnecessary bytes before the page can paint.	Reduced render-blocking CSS and faster FCP/LCP.	Medium
Critical	Minimize main-thread work	Consider reducing the time spent parsing, compiling and executing JS. You may find delivering smaller JS payloads helps with this. [Learn how to minimize main-thread work] (https://developer.chrome.com/docs/lighthouse/performance/mainthread-work-breakdown/)	Heavy main-thread work delays rendering and blocks user input.	Reduced TBT and faster interaction readiness.	Hard
Critical	Minimize main-thread work	Consider reducing the time spent parsing, compiling and executing JS. You may find delivering smaller JS payloads helps with this. [Learn how to minimize main-thread work] (https://developer.chrome.com/docs/lighthouse/performance/mainthread-work-breakdown/)	Heavy main-thread work delays rendering and blocks user input.	Reduced TBT and faster interaction readiness.	Hard
Critical	Reduce JavaScript execution time	Consider reducing the time spent parsing, compiling, and executing JS. You may find delivering smaller JS payloads helps with this. [Learn how to reduce Javascript execution time] (https://developer.chrome.com/docs/lighthouse/performance/boottup-time/).	Expensive JavaScript boot-up blocks the main thread during load.	Lower TBT and faster interactive readiness.	Hard
Critical	Reduce JavaScript execution time	Consider reducing the time spent parsing, compiling, and executing JS. You may find delivering smaller JS payloads helps with this. [Learn how to reduce Javascript execution time] (https://developer.chrome.com/docs/lighthouse/performance/boottup-time/).	Expensive JavaScript boot-up blocks the main thread during load.	Lower TBT and faster interactive readiness.	Hard
High	Minify JavaScript	Minifying JavaScript files can reduce payload sizes and script parse time. [Learn how to minify JavaScript] (https://developer.chrome.com/docs/lighthouse/performance/unminified-javascript/).	Unminified JavaScript increases transfer size and parse cost.	Reduced JS transfer and parse time.	Easy

Priority	Issue	Description	Why it matters	Expected improvement	Difficulty
High	Minify JavaScript	Minifying JavaScript files can reduce payload sizes and script parse time. [Learn how to minify JavaScript] (https://developer.chrome.com/docs/lighthouse/performance/unminified-javascript/).	Unminified JavaScript increases transfer size and parse cost.	Reduced JS transfer and parse time.	Easy
High	Minify CSS	Minifying CSS files can reduce network payload sizes. [Learn how to minify CSS] (https://developer.chrome.com/docs/lighthouse/performance/unminified-css/).	Unminified CSS sends unnecessary bytes and can slow render-blocking stylesheets.	Reduced CSS transfer size and faster render start.	Easy
High	Minify CSS	Minifying CSS files can reduce network payload sizes. [Learn how to minify CSS] (https://developer.chrome.com/docs/lighthouse/performance/unminified-css/).	Unminified CSS sends unnecessary bytes and can slow render-blocking stylesheets.	Reduced CSS transfer size and faster render start.	Easy
High	Avoid enormous network payloads	Large network payloads cost users real money and are highly correlated with long load times. [Learn how to reduce payload sizes] (https://developer.chrome.com/docs/lighthouse/performance/total-byte-weight/).	Large total transfer size slows page load and hurts users on slower connections.	Lower page weight and faster load time.	Medium
High	Avoid enormous network payloads	Large network payloads cost users real money and are highly correlated with long load times. [Learn how to reduce payload sizes] (https://developer.chrome.com/docs/lighthouse/performance/total-byte-weight/).	Large total transfer size slows page load and hurts users on slower connections.	Lower page weight and faster load time.	Medium
Low	Avoid large layout shifts	These are the largest layout shifts observed on the page. Each table item represents a single layout shift, and shows the element that shifted the most. Below each item are possible root causes that led to the layout shift. Some of these layout shifts may not be included in the CLS metric value due to [windowing] (https://web.dev/articles/cls#what_is_cls). [Learn how to improve CLS] (https://web.dev/articles/optimize-cls)	Layout shifts create visual instability and can hurt Page Experience.	Lower CLS and a more stable user experience.	Medium
Low	Avoid large layout shifts	These are the largest layout shifts observed on the page. Each table item represents a single layout shift, and shows the element that shifted the most. Below each item are possible root causes that led to the layout shift. Some of these layout shifts may not be included in the CLS metric value due to [windowing] (https://web.dev/articles/cls#what_is_cls). [Learn how to improve CLS]	Layout shifts create visual instability and can hurt Page Experience.	Lower CLS and a more stable user experience.	Medium

Priority	Issue	Description	Why it matters	Expected Improvement	Difficulty
		(https://web.dev/articles/optimize-cls)			
Low	Avoid long main-thread tasks	Lists the longest tasks on the main thread, useful for identifying worst contributors to input delay. [Learn how to avoid long main-thread tasks] (https://web.dev/articles/optimize-long-tasks)	Long tasks block the browser from responding quickly to user input.	Lower TBT and smoother interaction readiness.	Hard
Low	Avoid long main-thread tasks	Lists the longest tasks on the main thread, useful for identifying worst contributors to input delay. [Learn how to avoid long main-thread tasks] (https://web.dev/articles/optimize-long-tasks)	Long tasks block the browser from responding quickly to user input.	Lower TBT and smoother interaction readiness.	Hard
Data Not Available	CDN Usage Recommendations	Data Not Available	A CDN can reduce latency by serving static assets closer to users.	Reduced latency for static resources when CDN coverage is applicable.	Medium
Data Not Available	Cache Policy / Efficient Cache Lifetime	Data Not Available	Short cache lifetimes force repeat visitors to re-download static assets.	Faster repeat visits and reduced network transfer.	Easy
Data Not Available	Critical Request Chains	Data Not Available	Long dependency chains delay discovery of render-critical resources.	Earlier rendering and improved FCP/LCP.	Hard
Data Not Available	Excessive DOM Size	Data Not Available	Large DOMs increase style calculation, layout work, memory use, and interaction latency.	Less main-thread work and better interaction responsiveness.	Hard
Data Not Available	Legacy JavaScript Serving	Data Not Available	Legacy JavaScript sends extra code to modern browsers and increases parse/compile work.	Smaller JavaScript payloads and reduced main-thread work.	Medium
Data Not Available	Network Dependency Analysis	Data Not Available	A complex dependency tree delays important requests and amplifies latency.	Shorter critical path and faster content rendering.	Hard
Data Not Available	Next-Generation Image Formats (WebP/AVIF)	Data Not Available	Legacy image formats are often larger than WebP or AVIF equivalents.	Reduced image bytes and faster visual loading.	Medium
Data Not Available	Offscreen Image Deferral (Lazy Loading)	Data Not Available	Below-the-fold images compete with above-the-fold content for bandwidth.	Fewer initial requests and faster first viewport rendering.	Easy
Data Not Available	Properly Sized Images	Data Not Available	Oversized images waste bandwidth and delay LCP, especially on mobile.	Lower image transfer and faster LCP.	Medium
Data Not Available	Render Blocking Resources	Data Not Available	Blocking CSS and synchronous scripts delay first paint and LCP.	Faster FCP and LCP.	Medium
Data Not Available	Third-party Code Impact	Data Not Available	Third-party scripts can block the main thread and add network latency outside your release control.	Reduced main-thread blocking and fewer competing network requests.	Medium

Priority	Issue	Description	Why it matters	Expected improvement	Difficulty
Data Not Available	font-display Optimization	Data Not Available	Web fonts can hide text while downloading, delaying readable content.	Text appears sooner and perceived performance improves.	Easy

GTmetrix Top Issues & Prioritized Recommendations

This table follows the GTmetrix Top Issues style as closely as possible using actual Lighthouse/PageSpeed values when available. GTmetrix-only values are marked as Data Not Available unless a GTmetrix data source is connected.

RANK	ISSUE NAME	SEVERITY	AFFECTED PAGES	TIME SAVINGS	SIZE SAVINGS	DIFFICULTY	EXPECTED GAIN
#1	Reduce unused JavaScript	Critical	https://www.amipi.com (mobile)	3.0s	1.2 MB	Medium	Lower JS transfer, faster parsing, reduced TBT, and improved LCP on script-heavy pages.
GTmetrix recommendation: Remove unused scripts, split bundles by route, defer non-critical code, and load features only when needed.							
#2	Reduce unused JavaScript	Critical	https://www.amipi.com (desktop)	680ms	1.2 MB	Medium	Lower JS transfer, faster parsing, reduced TBT, and improved LCP on script-heavy pages.
GTmetrix recommendation: Remove unused scripts, split bundles by route, defer non-critical code, and load features only when needed.							
#3	Reduce initial server response time	Critical	https://www.amipi.com (desktop)	555ms	Data Not Available	Hard	Lower TTFB and faster FCP/LCP.
GTmetrix recommendation: Add server-side caching, optimize database queries, tune hosting, and use edge caching where appropriate.							
#4	Reduce initial server response time	Critical	https://www.amipi.com (mobile)	538ms	Data Not Available	Hard	Lower TTFB and faster FCP/LCP.
GTmetrix recommendation: Add server-side caching, optimize database queries, tune hosting, and use edge caching where appropriate.							
#5	Reduce unused CSS	Critical	https://www.amipi.com (mobile)	450ms	125 KB	Medium	Reduced render-blocking CSS and faster FCP/LCP.
GTmetrix recommendation: Remove unused selectors, split critical CSS, and load non-critical styles after first render.							
#6	Reduce unused CSS	Critical	https://www.amipi.com (desktop)	130ms	127 KB	Medium	Reduced render-blocking CSS and faster FCP/LCP.
GTmetrix recommendation: Remove unused selectors, split critical CSS, and load non-critical styles after first render.							
#7	Minimize main-thread work	Critical	https://www.amipi.com (desktop)	Data Not Available	Data Not Available	Hard	Reduced TBT and faster interaction readiness.

RANK	ISSUE NAME	SEVERITY	AFFECTED PAGES	TIME SAVINGS	SIZE SAVINGS	DIFFICULTY	EXPECTED GAIN
GTmetrix recommendation: Reduce script execution, split long tasks, move expensive work off-thread, and simplify layout work.							
#8	Minimize main-thread work	Critical	https://www.amipi.com (mobile)	Data Not Available	Data Not Available	Hard	Reduced TBT and faster interaction readiness.
GTmetrix recommendation: Reduce script execution, split long tasks, move expensive work off-thread, and simplify layout work.							
#9	Reduce JavaScript execution time	Critical	https://www.amipi.com (desktop)	Data Not Available	Data Not Available	Hard	Lower TBT and faster interactive readiness.
GTmetrix recommendation: Trim third-party scripts, defer non-critical JavaScript, and break large bundles into smaller chunks.							
#10	Reduce JavaScript execution time	Critical	https://www.amipi.com (mobile)	Data Not Available	Data Not Available	Hard	Lower TBT and faster interactive readiness.
GTmetrix recommendation: Trim third-party scripts, defer non-critical JavaScript, and break large bundles into smaller chunks.							
#11	Minify JavaScript	High	https://www.amipi.com (desktop)	Data Not Available	45 KB	Easy	Reduced JS transfer and parse time.
GTmetrix recommendation: Minify JavaScript in the production build and remove source-only code from served bundles.							
#12	Minify JavaScript	High	https://www.amipi.com (mobile)	Data Not Available	45 KB	Easy	Reduced JS transfer and parse time.
GTmetrix recommendation: Minify JavaScript in the production build and remove source-only code from served bundles.							
#13	Minify CSS	High	https://www.amipi.com (desktop)	Data Not Available	2 KB	Easy	Reduced CSS transfer size and faster render start.
GTmetrix recommendation: Minify CSS in the build pipeline and serve compressed production assets.							
#14	Minify CSS	High	https://www.amipi.com (mobile)	Data Not Available	2 KB	Easy	Reduced CSS transfer size and faster render start.
GTmetrix recommendation: Minify CSS in the build pipeline and serve compressed production assets.							
#15	Avoid enormous network payloads	High	https://www.amipi.com (desktop)	Data Not Available	Data Not Available	Medium	Lower page weight and faster load time.
GTmetrix recommendation: Compress assets, remove unused code, optimize images, and audit third-party payloads.							
#16	Avoid enormous network payloads	High	https://www.amipi.com (mobile)	Data Not Available	Data Not Available	Medium	Lower page weight and faster load time.
GTmetrix recommendation: Compress assets, remove unused code, optimize images, and audit third-party payloads.							

RANK	ISSUE NAME	SEVERITY	AFFECTED PAGES	TIME SAVINGS	SIZE SAVINGS	DIFFICULTY	EXPECTED GAIN
#17	Avoid large layout shifts	Low	https://www.amipi.com (desktop)	Data Not Available	Data Not Available	Medium	Lower CLS and a more stable user experience.
GTmetrix recommendation: Reserve image/ad/embed dimensions, avoid injecting content above existing content, and stabilize fonts.							
#18	Avoid large layout shifts	Low	https://www.amipi.com (mobile)	Data Not Available	Data Not Available	Medium	Lower CLS and a more stable user experience.
GTmetrix recommendation: Reserve image/ad/embed dimensions, avoid injecting content above existing content, and stabilize fonts.							
#19	Avoid long main-thread tasks	Low	https://www.amipi.com (desktop)	Data Not Available	Data Not Available	Hard	Lower TBT and smoother interaction readiness.
GTmetrix recommendation: Split long tasks, defer non-critical JavaScript, and reduce expensive synchronous work.							
#20	Avoid long main-thread tasks	Low	https://www.amipi.com (mobile)	Data Not Available	Data Not Available	Hard	Lower TBT and smoother interaction readiness.
GTmetrix recommendation: Split long tasks, defer non-critical JavaScript, and reduce expensive synchronous work.							

Consolidated Optimization Roadmap

Roadmap sorted by priority and measured savings where data is available.

Priority	Optimization	Time Savings	Data Savings	Difficulty	SEO Impact	Performance Impact	Estimated Lighthouse Score Improvement
Critical	Reduce unused JavaScript	3.0s	1.2 MB	Medium	Medium	High	Data Not Available
Critical	Reduce unused JavaScript	680ms	1.2 MB	Medium	Medium	High	Data Not Available
Critical	Reduce initial server response time	555ms	Data Not Available	Hard	High	High	Data Not Available

15. Complete Findings Inventory (Export)

The full list of all **4830** findings across every single URL has been moved to a separate spreadsheet attachment to keep this document concise.

Full findings (4830 rows): see attached `amipi_findings_20260719_161615.csv`

16. Methodology & Limitations

Breadth-first internal crawl with static HTML inspection, response timing, payload measurement, technical SEO, metadata, accessibility, content, URL, and performance checks. Note: Scoring is derived from an internal crawl methodology and is not directly equivalent to third-party audit tool scores.

- Performance values are server-response and HTML payload measurements, not a Lighthouse lab run; LCP, CLS, INP, and TBT require browser instrumentation.
- Accessibility checks cover detectable markup only and do not replace keyboard, screen-reader, contrast, or WCAG conformance testing.
- Backlink authority, rankings, and traffic require external search-provider data and are not inferred by this crawler.

Run window: 2026-07-19T15:58:43.170303+00:00 to 2026-07-19T16:14:33.095711+00:00
